ASTHMA FIRST AID

Blue/Grey Reliever

Airomir, Asmol, Ventolin or Zempreon and Bricanyl

Blue/grey reliever medication is unlikely to harm, even if the person does not have asthma

DIAL TRIPLE ZERO (000) FOR AN AMBULANCE IMMEDIATELY IF THE PERSON:

- is not breathing
- suddenly becomes worse or is not improving
- is having an asthma attack and a reliever is not available
- is unsure if it is asthma
- has a known allergy to food, insects or medication and has SUDDEN BREATHING DIFFICULTY, GIVE ADRENALINE AUTOINJECTOR FIRST (if available)

SIT THE PERSON UPRIGHT

- Be calm and reassuring
- Do not leave them alone

2

GIVE 4 SEPARATE PUFFS OF RELIEVER PUFFER

- Shake puffer
- Put 1 puff into spacer
- Take 4 breaths from spacer
 - Repeat until 4 separate puffs have been taken

If using **Bricanyl** (5 years or older)

- Do not shake. Open, twist around and back, and take a deep breath in
- Repeat until 2 separate inhalations have been taken

If you don't have a spacer handy in an emergency, take <u>1 puff</u> as you take <u>1 slow, deep breath</u> and hold breath for as long as comfortable. **Repeat** until all puffs are given

3

WAIT 4 MINUTES If breathing does not return to normal, give
 4 more separate puffs of reliever as above

Bricanyl: Give 1 more inhalation

IF BREATHING DOES NOT RETURN TO NORMAL

DIAL TRIPLE ZERO (000)

- Say 'ambulance' and that someone is having an asthma attack
- Keep giving 4 separate puffs every
 4 minutes until emergency assistance arrives

Bricanyl: Give 1 more inhalation <u>every 4 minutes</u> until emergency assistance arrives
